Milwaukee, Wisconsin 53225

Dear Polished Concrete,

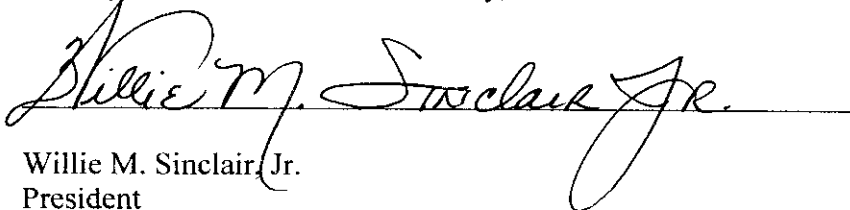

We want to thank you for the excellent job your company did on the garage retaining wall and slab at the Bradley Tech rehabilitation house project. I was very impressed with Dan Krueger's knowledge of concrete products and his quick grasp of the scope and sequence of work that I wanted Polished Concrete to do. The Polished Concrete and Retaining Walls, Inc. portfolio that was presented by Dan was thorough and informative, it also, reassured me that your business was reputable and would deliver a quality product.

The Polished Concrete work crews were always very professional, courteous, friendly, conscientious, and excellent artisans of concrete. The concrete crew did an outstanding job on the garage curb and slab, and Ryan's retaining wall crew paid great attention to every small detail from the retaining wall waterproofing to the placement of ½" threaded rods in the retaining wall block.

Working with Polished Concrete and Retaining Walls, Inc. was one of the most satisfying and problem free experiences that I have had while working with contractors. I will definitely recommend your company to anyone who needs concrete work or retaining walls. Thanks again for your timely skills and services.

Respectfully,

Bradley Tech Construction Academy, Inc.

Willie M. Sinclair, Jr.
President
